

Linkpro 2025

Medical Equipment Interfacing services:
 - Uni-Directional
 - Bi-Directional

ATTRACTIVE PRICES AND SCALABLE SOLUTIONS

Incorporate Interfacing strategy into your lab communications flow to have a fast and cost-effective way of connecting geographically dispersed diagnostics equipments.

Linkpro in conjunction with right Lab Information system provides gateway for an automated diagnostic lab. It comes with full support for uni-directional an bi-directional interfacing solutions.

Linkpro interfacing services are amazingly **fast** and with accurate delivery capacities. The solution would provide **Real time** data notifications and dispatch-ready reports.

Using Linkpro-Gateway, **Linkpro 2025** is capable of delivering:

- Accurate results
- Error free data entry
- Faster work processes in a dynamic & automated Diagnostic Lab environment
- Operator independent work processes
- NABL compliant data verification edge
- Bar Codes & Sample handling in a secure manner
- Reduces any of mixing up of patient test results
- Future enabled LIMS applications
- Cost benefits
- Demonstrably improved analytical quality
- Better analyst job satisfaction.

On **Linkpro** platform we also provide:

-  Support for complete interfacing and LIMS
-  Delivery support for web enabled telemedicine scenario
-  Secure & encryption plug-in services
-  Integration with existing HMS or LIMS

For private circulation only

Linkpro Bulletin
 15th July, 2007

Current News

Month of July, 2007 has given us the pride of accomplishing a feat of developing following Diagnostic Lab interfacing solutions:

1. **UniCel Dxc 800**
2. **Bayer's Urine Analyzer**
3. **Beckman Coulter HMX**
4. **Roche's Hitachi 912**
5. **Sysmex SF-3000 Automated Hematology Analyzer**

This time the problem of the client had been a little complex. He was looking for a solution in which individual machine should produce diagnostics reports too along with capturing of data from these machines.

Also, we had to formulate a distinct policy of securing data stream to build secure environment of operations.

All these machines were connected to the back end database on Oracle and SQL Server. These databases were designed and optimized by either HMS or LIMS supplier.

Significant financial and quality benefits arose from interconnecting laboratory systems, especially due to a high degree of automation that was included in the business deal.

Linkpro is an incredibly fast to deploy and easy to maintain application front end. It acts as interfacing plug-in application. A surprising range of automation and integration requirements can be met with **Linkpro's** fully configurable product/solution. *Linkpro is a highly configurable, easy to implement and simple to use instrument interfacing and integration product/solution.*
